STAT

MEMORANDUM FOR:

SUBJECT: Comments on Your Draft Memo to General Wilson on Systematic Product Review

1. We should make clear what we mean by "national intelligence production." I assume we include the finished products of CIA, DIA, and INR. But what about the NSA SIGINT Summary, which is (or is not) finished intelligence, depending on your point of view, and the (more or less) departmental publications of the Air Force (e.g., FTD) and the Navy? I would favor including these also, but others in PRD might not.
2. 2a seems very nebulous, and I suggest you drop it.
3. I propose, vice your para. 4, the test study review all the production pertinent to the FY 75 KIQs of one NIO (e.g., the Soviet Union-EE NIO or the WE NIO). Your proposal reads as if it were a separate project.
4. I have given copies of your draft to the others in PRD for their comments to you before C.O.B. tomorrow.
